

History

GS&T S.r.l. was founded at the beginning of 2000, as a typically family owned Company with a limited number of employees to guarantee high flexibility, fast decision making and accurate customer care, in order to comply with today's Market requirements and expectations.

The team at GS&T is represented by well experienced and highly skilled staff, working in this business since many years now.

The production is focused mainly on the equipments dedicated to the metal packaging industry, but the deep know-how of mechanics and resistance welding technology make GS&T the reliable partner for customized production in different fields of application (Automotive, Household appliances, etc.)

Factory

GS&T is in the neighbourhood of Turin, one of the most important industry poles on the Italian and European level. Today GS&T has 15 employees and an area of 1.000 sqm mainly dedicated to the manufacturing and assembly operations.

Structure

Let alone the benefits it has got from the typical flexibility of small size companies, GS&T is by the way well structured at its inside in order to guarantee the right support to the customer in all the phases of the project, by listening carefully to what the customer demands.

Production Facility

GS&T personally takes care of the designing and manufacturing/assembling of the equipments, while in the meantime it cooperates with highly skilled sub-suppliers for the outsourcing activities. This modern approach allows GS&T to be extremely flexible in its resources and to keep the quality of the finished product to the maximum level while controlling the running costs in order to obtain the right market price.

Our products

For Metal packaging

- Automatic can body welder
- Automatic drum welding body maker
- Automatic sheet feeder
- Automatic and semi-automatic electrostatic powder seam coating system
- Air spray and Air less lacquer seam coating systems
- Gas and electrical curing system for seam coating polymerization
- Lacquer application systems for welded ears protection on pails
- Magnetic elevators and conveyors for cans, pails and drums

For Household appliance (water heaters and dish washers)

- Automatic roll forming and welding machine for water heater tanks and external jackets
- Special automatic roll forming and welding machine for round, square, rectangular and shaped bodies
- Automatic sheet feeder
- Drawn and cutting systemAutomotive and others

Automotive and others

GS&T offers to its customer other type of machines according to their specific requirements in the field of resistance welding and in the Automotive (assembling and test equipment, etc.)
